### ONLINE BANKING

Please be aware that Community State Bank takes very seriously its job of protecting your financial information. The Online Banking product that we offer to you is protected with state of the art equipment and software to ensure that you are the only person gaining access to your information. For the purpose of security we stress to you the following points: 1) Do not share your user identification and/or password information with any other individual, 2) Do not write this information down and leave at a place of business or work area. With your user id and password an imposter can assess your accounts as easily as you, yourself. It is not a good idea to have the computer remember your password.

Note that we will never contact you asking for your id and password. Do NOT give this information to anyone. We will not email sensitive information to you through an unencrypted means. We may ask you to appear in person to setup your Online Banking account information. Please keep in mind that this is for your protection.

Since email is not a secure way to transfer sensitive information. We are asking that you hand deliver the completed application & attachment, fax or send through regular mail. Once your account is setup the ID and Password will be issued to you. For security reasons we have asked some questions that will help us verify that we are talking with the actual account owner in the future. We would prefer that you come into one of our locations to pick up your ID and password information. If this isn't feasible just let us know and we will mail the information to you.
